

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

زهرا فتحی فر

کتابخانه دانشکده بهداشت و تغذیه

۱۳۹۲/۲/۱۲

نام کارگاه: جستجوی منابع الکترونیکی

- آشنایی با شیوه علمی جستجو، چرایی و چگونگی آن
- آشنایی با مهمترین پایگاههای آبونه دانشگاه
- آشنایی با Web of Knowledge
- آشنایی با Pubmed
- آشنایی با Scopus
- آشنایی با Ovid

جستجوی علمی، چرایی

- افزایش روزافزون اطلاعات
- تنوع منابع اطلاعاتی منتشر شده
- ضرورت انجام تحقیقات علمی
- غرق شدگی اطلاعات

جامعه علمی را با چالشی جدی مواجه می کند
پیدا کردن اطلاعات مرتبط و معتبر

جستجوی علمی، چگونگی

- طرح یک سوال خوب علمی منجر به جستجویی موفق و خوب می شود.

- انتخاب پایگاه اطلاعاتی مناسب منجر به یافتن بهترین شواهد و نتایج می شود.

برنامه ریزی برای کاوش موفق

۱- طرح یک پرسش

- تعیین مفهوم یا مفاهیم (**Concepts**) مورد جستجو

- تعیین کلیدواژه ها، واژه های مترادف، مشابه، خاصتر و عامتر موضوع مورد جستجو

- نگارش یک عبارت یا استراتژی برای آغاز جستجو

۲- انتخاب پایگاه اطلاعاتی مناسب

- انتخاب پایگاه اطلاعاتی بر اساس نیاز اطلاعاتی و موضوع پایگاه

- آگاهی از قابلیت های پایگاه اطلاعاتی و نحوه جستجوی موثر در آن

۳- ارزیابی و بررسی نهایی نتایج جستجو

- روشی ساختارمند برای ارزیابی درستی (**Validity**) و ارتباط (**Relevance**) نتایج

- تعیین مناسب ترین و کامل ترین منابع و دستیابی به متن کامل آنها

چند نکته

- پیش از شروع جستجو بدانید دقیقا چه چیزی را می خواهید بازیابی کنید. (مقاله، کتاب، عکس، آمار، فیلم و ...)
- به موضوع اصلی و موضوعات وابسته دقیقا توجه کنید. (تعیین کلیدواژه های جستجو)
- ابزار مناسب برای جستجوی خود را انتخاب کنید. (موتورهای کاوش، پایگاههای اطلاعاتی و ...)
- از عملگرهای بولی ، استراتژی مناسب و روشهای مناسب هر موتور یا پایگاه اطلاعاتی استفاده کنید.

مراحل جستجو

- فرموله کردن سوال یا مشکل (**Problem formulation**)
مداقل اجزای ضروری سوالی را که در ذهن داریم برای رسیدن به پاسخ مناسب باید بدانیم.
- تعیین و تدوین استراتژی مناسب (**Search strategy**)
متودولوژی مناسب جستجو در پایگاه مورد نظر مشخص گردد.
- کاوش منابع اطلاعاتی (**Literature search**)
یافتن پژوهش های مرتبط در موضوع مورد جستجو در پایگاههای اطلاعاتی، مجموعه ژورنالهای الکترونیکی، موتورهای جستجو و ...

فرموله کردن سوال براساس مدل پیکو PICO

- What types of **P**articipants/Populations?
- What types of **I**nterventions/Exposures?
- What types of **C**omparisons?
- What types of **O**utcomes?

فرموله کردن سوال براساس مدل پیکو: اولین گام در پزشکی مبتنی بر شواهد (EBM)

- **Participants/Populations**

بیمار / جمعیت مورد مطالعه شما چه کسی است؟

- **Interventions/Exposures**

چه اقدام درمانی / مداخله ای یا مواجهه مدنظر شما است؟

- **Comparisons**

اقدامات دیگری که می توان انجام داد چیست؟ (مقایسه)

- **Outcomes**

نتیجه ای که انتظار دارید / به دست می آورید چیست؟

مثال

- آیا در شیرخواران بزرگتر از ۶ ماه بروز تشنج ناشی از تب، احتمال ابتلا به صرع را در آینده افزایش می دهد؟
- آیا در زنان باردار مبتلا به دیابت نوع ۲، (دریافت کننده انسولین) دریافت ماست همراه غذا در تنظیم قند خون، پروفایل لیپیدی و شاخص استرس اکسیداتیو نقش موثر دارد؟
- آیا آموزش رفتارهای تغذیه صحیح در نوع میان وعده های مصرفی پسران دانش آموز دبیرستانی تاثیری دارد؟

عملگرهای بولین

● **AND** : اشتراک مفاهیم را می رساند و جستجو را محدودتر می کند.
osteoarthritis AND physical therapy

● **OR** : اجتماع مفاهیم را می رساند و به معنی جمع منطقی است جستجو را وسعت می بخشد.

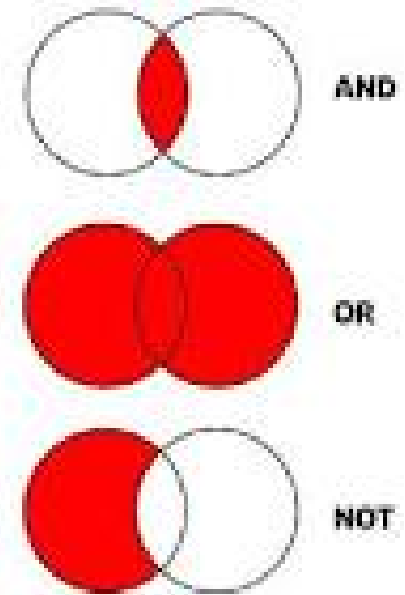

cancer OR neoplasm

● **NOT** : تفریق منطقی است و برای حذف مفهومی خاص یا مستثنی کردن به کار می رود.

Cancer NOT child

Boolean Operators

- STROKE **AND** ASPIRIN
- STROKE **OR** C.VASCULAR DISORDERS
- TRAUMA **NOT** ADULTS

- جستجوی عبارتی با علامت “ ” (Quotation)

“Lung cancer”

- کوتاه سازی (Truncation) با علامت * یا \$

Injur* : injury, injuries, injured

Cat* : cat, cats, category, cattle,...

- محدودیتهای (Limitations)

محدودیتهای زبانی، زمانی، منبع اطلاعاتی خاص یا شکل ارائه چون
pdf, powerpoint و ...

ارزیابی نتایج جستجو

• اگر تعداد نتایج زیاد و غیر مرتبط بود:

- با کمک متخصصین و اصطلاحنامه ها، کلمات تخصصی تر و محدودتر برای جستجوی خود بیابید •
- از محدودیتهایی مثل سال، زبان، جنس و ... استفاده کنید •
- جستجوی خود را به عنوان، چکیده و کلیدواژه محدود کنید •

• اگر تعداد نتایج بسیار محدود و ناکافی بود:

- از کلمات مترادف با استفاده از عملگر OR یا کلمات وسیعتر استفاده کنید •
- محدودیتهای غیر ضروری را حذف کنید •
- جستجو را به تمام متن گسترش دهید •
- املاي کلمات را کنترل کنید و واژه های اختصاری را کامل بنویسید •

چکیده مقاله

Abstract: Over the past 10 years, mitochondrial defects have been implicated in a wide variety of degenerative diseases, aging, and cancer. Studies on patients with these diseases have revealed much about the complexities of mitochondrial genetics, which involves an interplay between mutations in the mitochondrial and nuclear genomes. However, the pathophysiology of mitochondrial diseases has remained perplexing. The essential role of mitochondrial oxidative phosphorylation in cellular energy production, the generation of reactive oxygen species, and the initiation of apoptosis has suggested a number of novel mechanisms for mitochondrial pathology. The importance and interrelationship of these functions are now being studied in mouse models of mitochondrial disease.

Abstract

چکیده مقاله

BACKGROUND: Incidence proportion of post-traumatic stress disorder (PTSD) after motor vehicle accid...ably across countries, and whether heart rate (HR) and respiratory rate (RR) immediately after MVA predict subsequ...versal. This study examined the incidence proportion of PTSD at 6 months after MVA in Japan, and the predictors of PTSD in MVA survivors.

METHOD: Patients with MVA-related injuries consecutively admitted to the intensive care unit of a teaching hospital in Tokyo were recruited. Six months after MVA, PTSD was diagnosed using the Clinician Administered Post-traumatic Stress Disorder Scale (CAPS).

RESULTS: Of the 300 participants, 106 completed the assessments at 6 months after MVA and PTSD was diagnosed in 7.5% of the patients. Eight of the 300 participants (2.7%) were regarded as having PTSD after imputing their CAPS score at follow-up assessment for participants who dropped out. In multivariate regression analysis, no variables were shown to be independent predictors for PTSD. HR and RR did not predict PTSD in the analysis.

DISCUSSION: The results suggested that the incidence proportion of PTSD following MVA in Japan was lower than that in most developed countries, and HR and RR might not be accurate screening tools despite their importance in a fear-conditioning model of the genesis of PTSD.

- چند مقاله RCT موجود است؟

معرفی Scopus

- بزرگترین پایگاه اطلاعاتی استنادی و چکیده نویسی جهان
- بیش از ۲۰۵۰۰ عنوان از ۵۰۰۰ ناشر از کل دنیا را شامل می شود.
- توسط شرکت Elsevier در سال ۲۰۰۲ راه اندازی شد.
- مجموعه آن ۱۵٪ منابع Elsevier و ۸۵٪ از مجموعه سایر ناشران جهانی
- مجموعه آن شامل مقالات مجلات و کنفرانس ها (حدود ۵/۳ میلیون مقاله) ، کتاب (حدود ۳۶ سری)، ثبت اختراع و ... (بیش از ۴۹ میلیون رکورد که بیش از ۷۸٪ آنها چکیده دارند).
- تقریبا کل مدلاین را پوشش می دهد.
- هر سال بیش از ۲ میلیون رکورد به آن اضافه می شود.

To determine which author will be grouped together under a single identifier number, the Scopus Identifier uses an algorithm based on author names based on address, subject area, year of publication, citations, etc. Documents with insufficient information to be matched, this can lead to one entry in the results for an author. By default, only documents matched to more than one Scopus are shown in search results. [About Scopus](#)

Search

To determine which author names should be grouped together under a single identifier number, the Scopus Author Identifier uses an algorithm that matches author names based on their affiliation, address, subject area, source title, dates of publication, citations, and co-authors. Documents with insufficient data may not be matched, this can lead to more than one entry in the results list for the same author. By default, only details pages matched to more than one document in Scopus are shown in search results. [About Scopus Author Identifier](#)
